Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 25-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Forslund, US 5,544,338.

Re claims 1-7 and 25-31, Forslund discloses the same system and method for image pickup as claimed, essentially for high speed image processing for display. In Forslund, the plurality of photosites represent a plurality of image pickup means. Forslund also discloses a plurality of buffers which serve as a double buffer for simultaneous read/write operations. The read/write operations may be in forward or reverse direction. (See Abstract, figs. 7 and 9, col. 11, line 36 to col. 12, line 36, col. 13, line 26 to col. 14, line 5, col. 14, line 51 to col. 15, line 11, col. 17, line 31-53).

Response to remarks:

Applicant alleges that Forslund fails to disclose or suggest that the buffers serve as both a display buffer and as a recording buffer. Examiner disagrees.

The simultaneous read/write operations of the buffers in Forslund is indicative of the common operations of the same buffers for display and recording as claimed. This is clearly articulated in col. 13, lines 41-45, which emphasizes that the RAMs serve as a

Art Unit: 2613

double buffer. Furthermore, the Forslund patent is pertinent for image processing for display and/or for real time inspection in a manufacturing environment (col. 1, lines 14-17 and col. 3, lines 6-14). Thus, using the CCD scanner for image reading and image processing for display are inherent features of the Forslund patent. Therefore, the notion that Forslund fails to disclose or suggest using the buffers for both display and recording as alleged has no merit.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

4. Claims 8-24 have been canceled.
